

Post Task Survey - Control condition

Please tell us about your experiences within this study. Your answers are extremely valuable to us: the primary purpose of this study is to understand your experiences in programming work, both the positive and the negative.

We only need your email address to match your survey responses to your work; any reporting of your data will remain completely anonymous.

* Required

Email address *

Your email

1 - What was your approach to organizing your work and your time in this study?
How did you decide what order to address each of the issues? *

Your answer

2 - What challenges, if any, did you experience as you tried to begin work on this project? *

Your answer

3 - What challenges, if any, did you experience related to setting up the workspace (ex: installing libraries, packages, cloning the code, ...)? *

Your answer

4 - What challenges, if any, did you experience related to understanding and working with the provided codebase? *

Your answer

5 - What challenges, if any, did you experience related to your productivity? Were there any points where you felt you were missing the information you needed to work effectively? What information was missing? *

Your answer

6 - What challenges, if any, did you experience related to having a high-quality code? *

Your answer

7 - Any other comments or suggestions that you'd like to share?
